Experience

AI Engineer, *Vodafone Portugal*
October 2025 - Current

- Architected and deployed enterprise LLM features using Azure OpenAI, building end-to-end multi-agent systems and automated pipelines integrated into existing CI/CD workflows.
- Designed and built *DocGen*, an AI-driven system automating documentation generation and maintaining consistency across 30+ React components and 100+ microservices.
- Developed the AI Governance Portal, creating an AI agent system for real-time data validation, automated error correction, and an interactive chatbot UI.
- Optimized LLM performance & reliability through systematic prompt engineering, evaluation frameworks, and output validation guardrails.

Frontend Developer, *Vodafone Portugal*
February 2024 – October 2025

- **Engineered key user interfaces in React and Vue.js** across consumer and business web applications during a large-scale frontend migration.
- **Enhanced the TOBi chatbot interface**, improving user experience and conversational UX patterns for high-volume customer interactions.

Enterprise Application Integration Developer, *Vodafone Portugal*
December 2022 – February 2024

- Developed and maintained integration services using webMethods Integration Server
- Managed APIs through API Gateway, supporting system integration and service reliability
- Contributed to middleware solutions within Vodafone's CORE IT systems

Invited Teaching Assistant, ***Instituto Superior Técnico***
October 2021 – April 2022

- Supported Data Science course delivery and assisted students with practical assignments.

Research Developer | Artificial Intelligence, ***Primavera Business Software Solutions / Cegid***
July 2021 – September 2021

- Developed a chatbot using Python and Rasa to answer client queries
- Explored natural language processing techniques for conversational systems
- Authored a technical article about chatbot technologies (https://medium.com/@isabel.srsoares/chatbots-uma-tecnologia-do-futuro-cd39635ff7b5).

Education

Bachelor's and master's degree in computer science and engineering, *Instituto Superior Técnico*
September 2017 – November 2022

- *ATHENS Network Programme (03/2022):* Vehicular Crashworthiness at Technical University of Munich Grade: Very Good
- Academic Merit Award for the first year (2020/2021) of MSc Computer Science and Engineering.
- *Deloitte's award 2020/2021 (05/2021):* Awarded to the best student of the Data Science Course 2020/2021 at Instituto Superior Técnico

Skills

AI & ML: Azure OpenAI, LLMs, Prompt Engineering, Multi-Agent Systems, NLP
Programming: Python, JavaScript, TypeScript
Frontend: React, Vue.js, HTML, CSS
Tools: Git, CI/CD, Azure

Languages

Portuguese (Native) • English (Professional)

Interests

Photography • Boxing • LEGO • Running • Music • Pilates
